

Credit goes to Darth Trumpetus(for the strategy built into the deck) and some mysterious guy I cannot seem to find the name of who sent me the basic design for the cards based on which I made these years ago. Uploading these cards here now so that others may enjoy too.

Personally after playing many matches against all sorts of different star wars characters I found Grievous to be well balanced and portrayed somewhat accurately in terms of his abilities as per the movies. However if anyone would like to make changes feel free to email me for the .psd file.
