Actually more of a slight edit to the existing Darth Vader deck rather than a complete alternate deck, these cards are the result of general dissatisfaction with the original Darth Vader deck included with the game, and an ongoing debate of how to improve him. Lots of brainstorming and a decent amount of playtesting lead to the creation of these cards in an attempt to improve Vader's character and keep him more in line with his "Dark Lord of the Sith" persona

To use this variation of his deck, replace all 3 Wrath cards with the Lightsaber Throws, all 2 Dark Side Drain cards with the Weapon Pulls, and the original Your Skills Are Not Complete with this one.

The card backs are on the next page. Enjoy, and remember, never underestimate the power of the dark side.
